

UNI HOC

2011/2012

GOES

Partnership agreement

Since the start of the company back in 1972 Unihoc has continuously been one of the front runners in the mission of spreading the floorball sport around the globe. We have now taken this role one step further by signing a co-operation agreement with the International Floorball Federation (IFF) to become their official Floorball Material Provider. The agreement runs until the end of 2014 and includes all floorball materials that the IFF will use in its Official Competitions. Further, the newly released CR8ER ball will be the official match ball for all World Championships.

Unihoc is currently available in 53 countries around the globe, with active sponsorship agreements with the best teams and the national federations in the ten countries to the left. By launching this co-operation with the IFF we are certain to have a good foundation to keep moving forward in our mission to spread the sport.

Introducing

Power Bow!

Once again it is time to present a new revolutionary shaft technique from Unihoc. **INFINITY POWER BOW 26** and **PLAYER+ POWER BOW 26** are two brand new stick models that feature this ingenious shaft in molded carbon fibre, which also introduces the Air Pressure Rail System along with the new Window Grip Semi-VS grip. Together with the powerful Player+ blade and the new exciting Infinity blade these new technologies combine to create sticks that are equally great to look at and to play with.

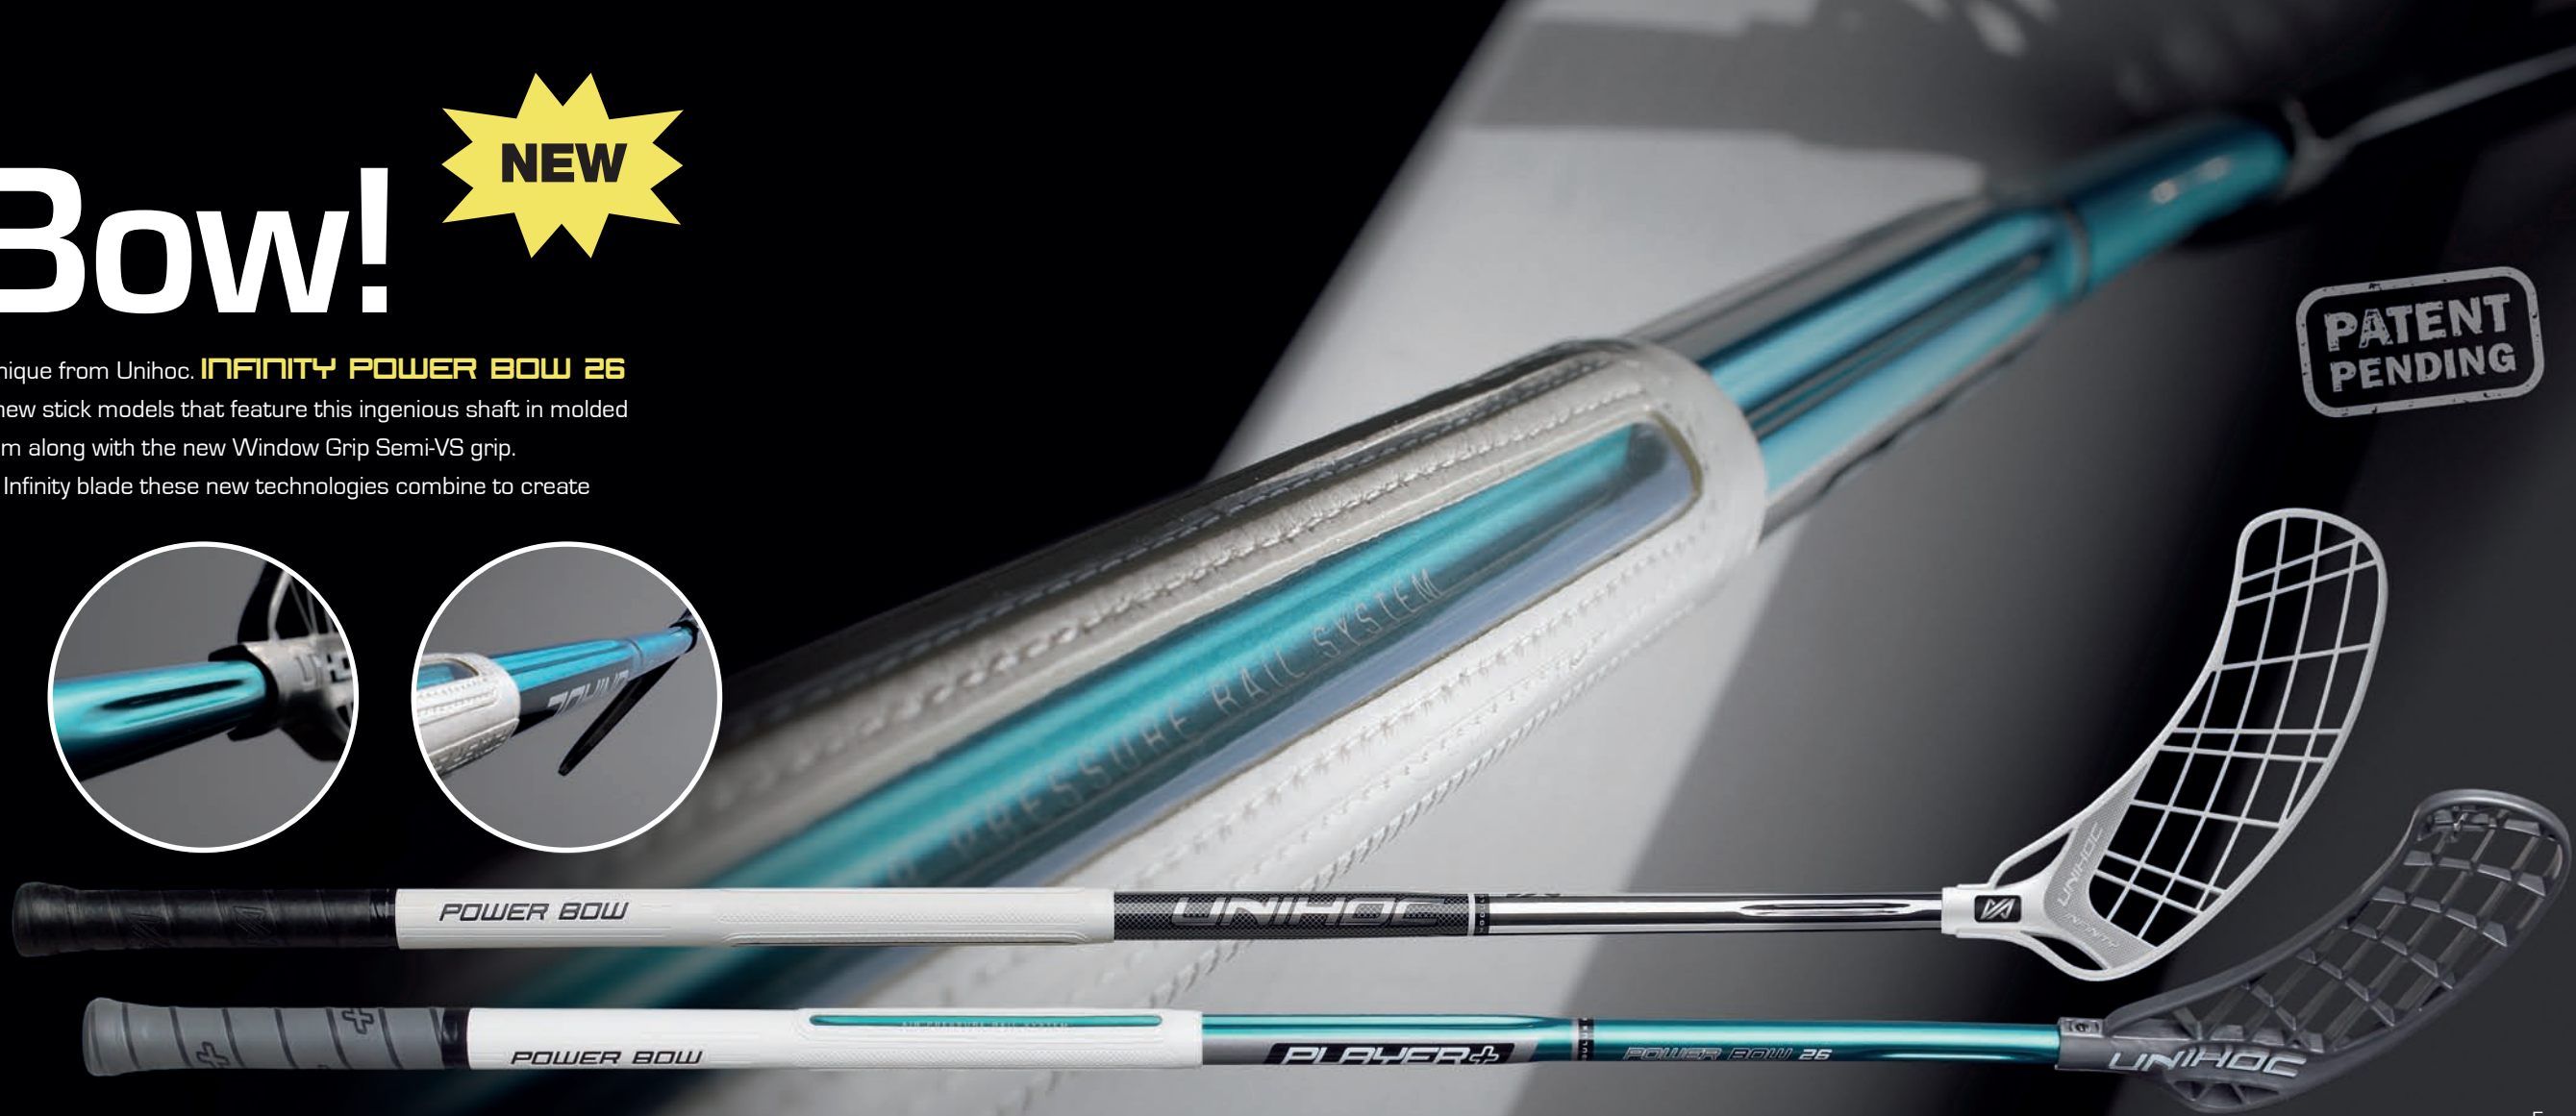

The **AIR PRESSURE RAIL SYSTEM** are two parallel grooves that are placed exactly in the area which is subject to the most pressure when firing a shot. They create a reinforced construction and channel the force in the shot direction.

The shaft has a **BOW** shape with a reduced angle for easier handling.

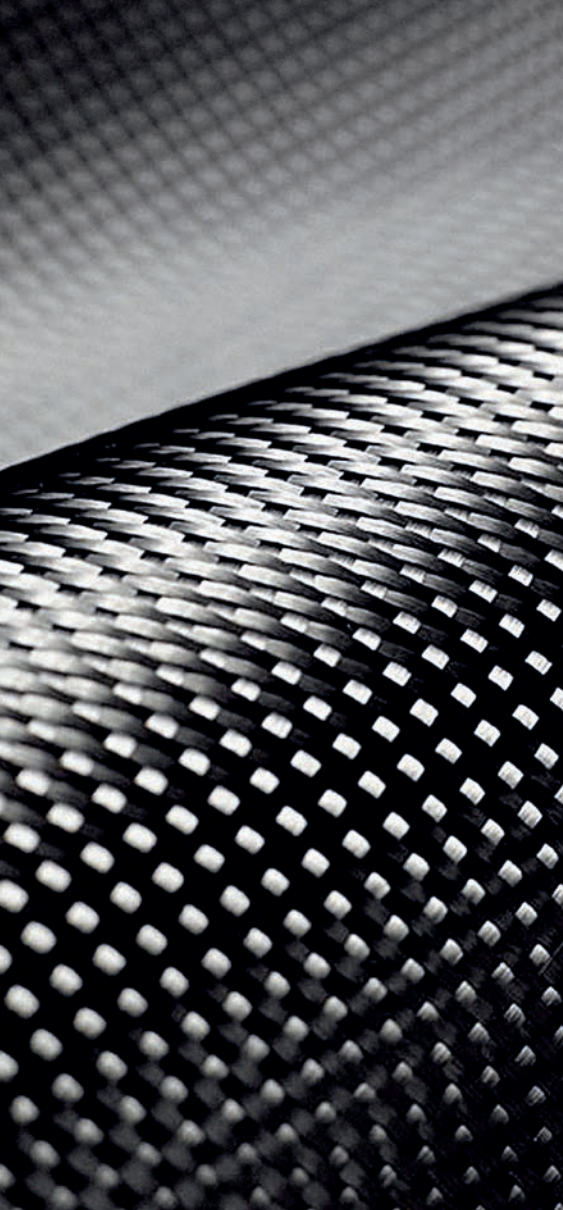

Another **POWER RAIL** has been placed along the front tip of the shaft to give added strength to the Bow construction.

Our new **WINDOW GRIP** in Semi-VS design offers a good grip at the same as it visualizes the shape of the shaft.

Keep your eyes open for further Power Bow releases during the summer of 2011!

PATENT PENDING

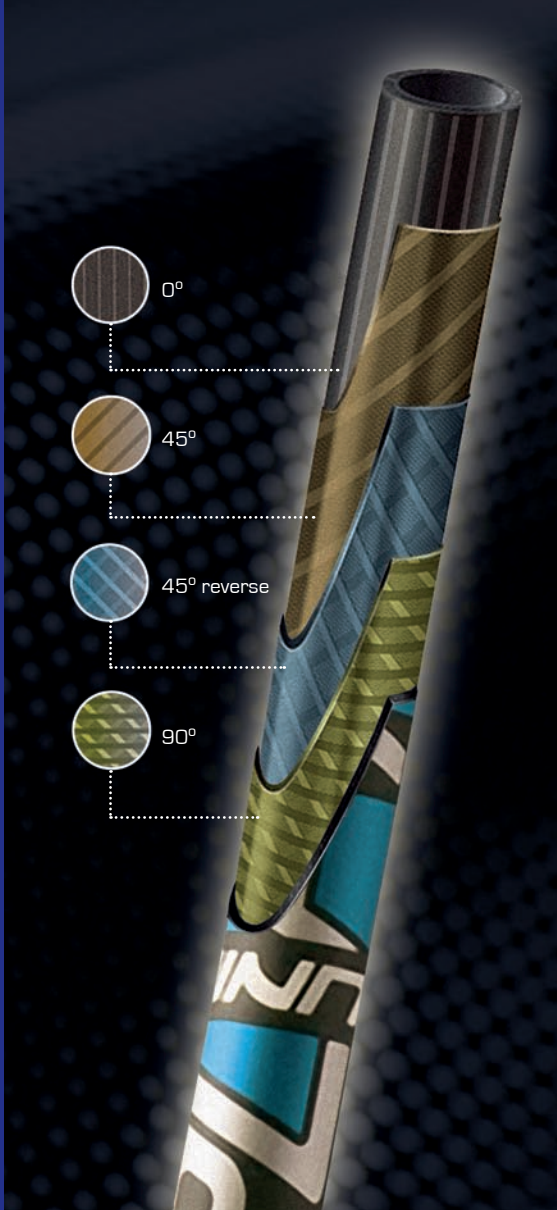

PRODUCTION PROCESS – Floorball shafts

To create a floorball shaft you need strong and durable raw materials. Our floorball shafts consist of top class carbon fibre and glass fibre, and normally a stick is a mix of these two materials, which is called composite. Simply put, you could say that the higher proportion carbon fibre used in the shaft, the better the final product becomes in terms of strength, stiffness, performance and low weight. The rebound of the shaft also gets faster by using a high percentage of carbon fibre in the shaft.

The production process of a shaft is very time consuming and consists of over 100 different steps before the final product is finished. The small pieces of woven carbon fibre pre-preg, which is the raw material that you start with, is placed along the shaft at different angles to give strength at the exactly correct positions and pressure points. Each shaft model is unique and the pattern for placing the carbon fibre is very different from stick to stick. For instance, a curved shaft has certain requirements and a straight shaft has completely different needs.

After having created the correct pattern of pre-preg pieces, the shaft is heated to 150 degrees Celsius inside a customized oven for approximately 40 minutes. Then the manual process of refining the shaft begins, and the customization includes a very large number of steps before the final product is complete with paint, decal, grip band and packaging. **In our opinion, it's a piece of art.**

This year's stick series are available with the following special shafts:

★ FEATHER

Actually, this is not a stick technique in its real sense. It is more a setup of the components of a complete stick, which together reduce the total weight of the model enough to create our lightest stick yet. The materials used in the grip band and in the blade are the lightest ones available on the market, and the result is simply Feather Light. To top it off, the Unihoc logos have been embossed into the shaft with a magnificent result.

Material: Air Pressure Carbon Fibre.

★ TOP LIGHT

The Top Light shaft is one of the lightest and most popular Unihoc shafts of all times, giving a completely new feeling for the game.

Material: Light weight Carbon Fibre.

★ CURVE

This world sensation is yet another fantastic invention by Unihoc. The lower part of the shaft is curved to create an increased angle towards the blade, adding increased power to the shots. We guarantee that the Curve shaft will give you a completely new floorball experience. Once you have tried your first shot you will know what we mean. The shaft is available with three different curved angles, and also with various flex.

Material: Air Pressure Carbon Fibre.

★ TWIN CURVE

Twin Curve is created to offer a new version of the popular Curve shaft, this time with a new curved handle solution for the upper hand which makes it possible to hold the stick closer to your body.

Material: Air Pressure Carbon Fibre.

★ BOW

One of our greatest inventions within the field of shaft technology is called BOW, which is a refined version of the successful Curve shaft. The bent shape of the shaft enables the player to transfer more power from the stick to the ball than ever before. The feeling of added power is very distinct. Hard gets harder, the feeling of control is increased and the joy of playing is inevitable.

Material: Air Pressure Carbon Fibre.

★ FEATHER CURVE

This model is exactly what its name says; a combination of the Feather Light stick and the Curve shaft. The result is our lightest Curve model yet.

Material: Air Pressure Carbon Fibre.

★ POWER BOW

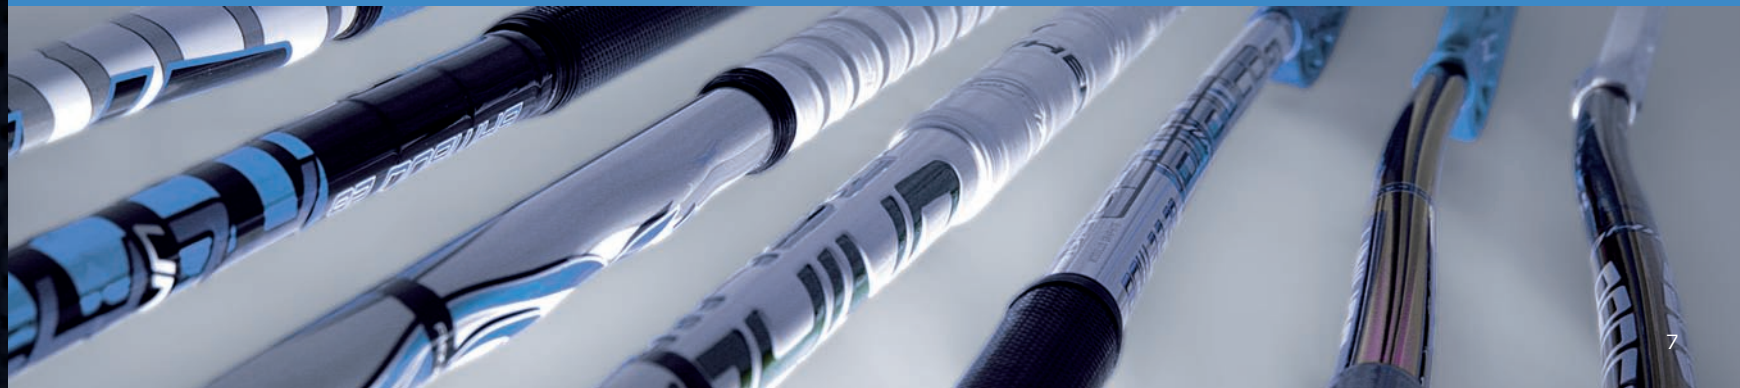

Power Bow is an enhanced version of the Bow shaft, featuring a reduced angle on the shaft and introducing the new Air Pressure Power Rail System, which reinforces the construction and channels the power in the shot direction. Our new Window Grip in Semi-VS design offers a great grip at the same time as it visualizes the shape of the shaft.

Material: Air Pressure Carbon Fibre.

★ BAMBOO

This bamboo shaped shaft is created with step power technique, bringing several advantages to the finished product. Its ingenious, yet simple construction makes it possible to create an extremely light shaft and still keep the strength of the flex. The fine-tuned balance of the shaft is extraordinary.

Material: Air Pressure Carbon Fibre.

INFINITY

NEW

PLAYER+

Infinity is the new stick series of the season, featuring a spectacular fading double-chrome shaft design in combination with an elegant Semi-VS grip band. It introduces the new Infinity blade which has a completely new look and optimized playing qualities, taking the Unihoc blade range to yet another level. The series is loaded with options, so no matter whether you prefer a well balanced straight stick with low weight or a curved stick for increased shot power you will find your wish fulfilled.

Using high-end solutions with carefully crafted details for all parts of the stick has made the exquisite Player+ series a front runner in the Unihoc range. The Semi-VS grip with easily replaceable top part and its partially see-through design perfectly matches the aesthetic chrome and metallic beauty of the shaft. The series features the popular Player+ blade, which optimizes the best features of the successful Player SQL blade and adds several new, modernized features and increased size.

PLAYER SQL

Our most successful stick series of all time plays an important role in our range. Using the best technology available in combination with an exclusive grip design and the same popular blade as before, Player SQL is destined to be the stick of choice for coming generations of players as well. It remains the undisputable benchmark for top class stick engineering.

VOLCANO

The classy, yet spectacular design combined with the benchmark technology that has always been the trademark of Unihoc ensures to make this series a natural success. The Volcano blade with its maximum dimensions, little concavity and aggressive, yet typical, Unihoc look has been developed to suit the best play-makers in the world. Volcano is the result of all our gathered experience and best components put together in a single stick.

IRULE

For the technical player this is a perfect choice. iRule has been shaped for extreme ball handling skills and sometimes for pure magic. This elegant stick series is not only seriously eye-catching, it is also very functional.

EVO3

This is a classic Unihoc series with a colourful, modern look with minimalistic features and an elegant grip band design. The model is featuring the popular EVO3 blade with its low weight and great shooting ability.

ACE

Year after year the classic ACE series continues to run successfully, and this season is no different. This stick is still the top choice for the player who enjoys the weekly workout with his friends, but as the keen floorball fan knows, it is also being successfully used even by elite players.

Niño

The Niño series has been especially developed to be the perfect choice for our youngest players, who need shorter sticks with more flex than grown-ups. The blade is tailor made for kids with its reduced size that makes it easy to handle and that also offers lower weight and increased ball control.

- Medium black / Art.no: 11895
- Hard white / Art.no: 11899

★ **74g**

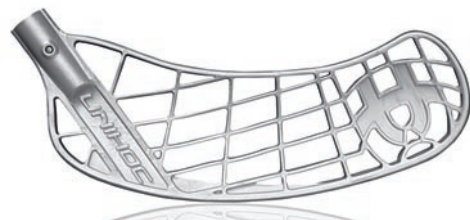

VOLCANO

For the VOLCANO blade we have maximized the playing surface of the face and combined it with the modest concavity and a longer radius towards the floor to create a top modern blade. The progressively tilted bars give an aggressive look; still there is no doubt that this is a typical Unihoc blade.

Medium black metallic / Art.no: 11963

Hard white / Art.no: 11969

Medium Feather Light white / Art.no: 11993 **77g**

BADGE

The BADGE blade was originally developed as an anniversary model, as a slightly adjusted version of the PLAYER SQL blade with the Unihoc symbol in the top. The success that followed made us keep the model in our regular blade range.

Medium black metallic / Art.no: 11873

Medium silver / Art.no: 11869

EVO3

EVO3 is the second generation of the successful EVO2 blade. The measures of the blade have been increased to create a larger face, but still keeping all the positive features of the first version.

Medium black / Art.no: 11887

Hard white / Art.no: 11889

Soft green metallic / Art.no: 11879

Soft neon orange / Art.no: 11881

Medium dark blue metallic / Art.no: 11885

iRULE

This is the Zorro blade from Unihoc. It has been based on the successful PLAYER SQL blade, with the addition of a pre-hooked top. Approved for match play by the IFF.

Medium purple metallic / Art.no: 11853

Medium lime yellow / Art.no: 11859

ACE

The ACE blade is created to make use of the maximal dimensions allowed, giving a larger face with a smooth concavity and a rounded top.

Medium black / Art.no: 11951

Hard white / Art.no: 11959

GOALIE

Over the years, Unihoc has been setting the standards for the most elaborate goalie gear available. Developing the right equipment for elite goalies as well as for goalies that merely play for the sake of exercise has been equally important. The range offers all the necessary items for a goalie, with several exciting alternatives to choose from in each segment.

SUMMIT

Our top-of-the-line series is called Summit, which is a complete range of high-end goalie equipment, developed in co-operation with the best goalkeepers in the world. The Summit series features a cutting edge range of goalie masks, which are the lightest on the market and with a completely unique design for the shell, the cage, the padding and the straps. In addition to the masks we also feature the Summit goalie dress, with a stylish and comfortable design for both sweaters and pants. The range also includes a Goalie T-shirt with a slim fit cut and comfortable padding.

BLOCKER

This year we have added a new style in our goalie collection, called BLOCKER. It is a modern goalie set created for the middle-end segment and it can be used either by goalies who practise seriously on a regular basis or by goalies who merely play for the sake of exercise. The BLOCKER sweater is available in two different colour combos and the pants are designed to suit both sweater designs. The set offers good qualities for both practise and match, and it also matches the new BLOCKER goalie mask perfectly.

Classic

To complete our goalie range, we also feature our long-running Classic collection. The Classic items are very functional garments of fine quality at a reasonable price for kids and non-elite goalkeepers.

Zürich Sublimation set

Now you can customize your own unique design for the Zürich set by using sublimation technology. This means that you can create your team's match set exactly as you want it in terms of colours, logos, player names and numbers. The design is sublimated into the fabric, which gives a soft garment without any printed transfers on it.

The new WORLD CHAMPIONSHIP match ball

- ★ Steadier ball flight
- ★ Increased speed

CR8ER

The revolutionary design of the CR8ER ball has been carefully developed in co-operation with both engineers and players, to ensure that theory applies well on reality and that no detail has been overlooked. It has been concluded that the one single feature that gives the ball a more steady flight through the air is the shape of the holes through the ball surface.
